Summary

Final-year ECE student at LNMIIT with hands-on experience in production backend systems, cloud infrastructure, and full-stack apps. Shipped a FastAPI SaaS boilerplate (JWT, Stripe, Celery, Docker); bootstrapped a 6-node HA Kubernetes cluster on AWS from scratch. Strong in system design, distributed systems, and data-intensive applications. **LeetCode Knight** (300+ problems) | **CAT 2025: 98.13 percentile**.

Technical Skills

- **Languages & Query:** Python, JavaScript/TypeScript, SQL, Shell (Bash), C
- **Backend:** FastAPI, REST APIs, JWT, Celery, Redis, Stripe, WebSockets
- **Databases:** PostgreSQL, SQLAlchemy (async), Alembic
- **Frontend:** Next.js, React, Tailwind CSS, Streamlit
- **Cloud & DevOps:** AWS (EC2, VPC, NLB, IAM), Kubernetes, Docker, Docker Compose, GitHub Actions
- **ML / Data:** PyTorch, scikit-learn, XGBoost, MLflow, Pandas, Power BI
- **Tools:** Git, Pytest, cfssl, etcd, containerd, CoreDNS

Projects

Production SaaS Boilerplate [GitHub](#)

Jan 2026

FastAPI, PostgreSQL, JWT, Stripe, Celery, Docker, GitHub Actions

- Built production-grade multi-tenant SaaS backend: async SQLAlchemy + Alembic migrations, clean layered architecture (routes/services/schemas/models).
- Full auth system: JWT access + refresh tokens, bcrypt, RBAC middleware, rate limiting; Stripe subscription lifecycle + webhook handling; Celery + Redis async jobs.
- Dockerised with Docker Compose (app + PostgreSQL + Redis); GitHub Actions CI/CD with Pytest suite — zero-downtime deploy ready.

Kubernetes the Hard Way — AWS [GitHub](#)

Feb 2026

AWS EC2/VPC/NLB, Kubernetes, etcd, cfssl, containerd, CoreDNS

- Bootstrapped 6-node HA K8s cluster (3 controllers + 3 workers) on AWS from scratch — no kubeadm — via shell scripts provisioning VPC, SGs, EC2, and NLB.
- Generated full PKI (CA, API server, kubelet, scheduler certs) using cfssl; peer TLS auth across etcd; control plane as systemd services; containerd + CNI + CoreDNS.

Financial RAG Assistant [GitHub](#) [Live Demo](#)

Feb 2026

Python, TF-IDF, BM25, RRF, Groq, Llama 3.3, Plotly, Streamlit

- Hybrid TF-IDF + BM25 (RRF fusion) RAG pipeline for financial doc Q&A — slashed memory 950 MB → 370 MB vs. neural embeddings; 90%+ QA accuracy.
- Live dashboards: stocks, crypto, FX, Fear & Greed index, portfolio risk metrics (Sharpe, VaR); news sentiment ingestion — deployed on Streamlit Cloud.

Achievements

- **Management Exams:** CAT 2025 — 98.13 percentile | XAT 2025 — 93.91 percentile
- **Competitive Programming:** LeetCode Knight (300+ problems solved) | JEE Advanced 2021 AIR 14,351
- **Certifications:** Oracle Database Foundations | Oracle SQL Programming
